PROJECTS

Project: Banking Management System
Tech Stack: Java Servlets, JSP, JDBC, Oracle Database, Bootstrap
Description:A secure, user-friendly web-based banking application that allows customers to manage their bank accounts, perform transactions, and view their transaction history. The system also provides an admin panel to manage all users and transactions.
- **User Authentication:** Secure login with role-based access (Customer/Admin).
- **Account & Transactions:** Manage accounts, deposits, withdrawals, and transaction history.
- **Admin Panel:** Admin can manage users and view all transactions.
- **Responsive UI:** Designed a clean, responsive userinterface using Bootstrap for better user experience.

Project: Alcohol Detection And Engine Lock System
- In our project, we have used ic lm 358 attached to an alcohol sensor which detects the presence of alcohol by analyzing breath of a person driving the vehicle.
- Engine of the vehicle is turned off and the emergency siren is blown as soon as alcohol isdetected, thereby minimizing the chances of any mishaps that could have happened. Therefore, loss of life and property is avoided.

Web Projects
- Developed a clone website of "Phonepe" and "Myntra" using HTML,CSS and JavaScript along with the Bootstrap frame Work.

CERTIFICATIONS

- Professional Email writing in English from coursera.
- Interview skils and soft skills by tcs ion.
- Attended 3 days workshop on PCB design.
- Prepinsta ceritication on DBMS , SQL and GIT&Github.

EXTRA CURRICULAR ACTIVITIES

- Successfully organised several events like "ROBODINO COMPETITION" in Tech Acme , mother's day and Talent hunt eventIn our college
- Won first prize in district level compition "Soccial Awareness Of Science".

INTERESTS

- Community Involvement
- Acting
- Entertainment Field
