Professional Summary

Front-End Developer with experience in creating modern and responsive web interfaces using React, JavaScript, and CSS. I have worked on projects for companies from different industries, delivering solutions focused on usability, performance, accessibility, and SEO. I also use A.I. tools to support code optimization and research, always applying strong critical thinking to ensure quality and precision in the results.

I aim to contribute to technology teams by delivering high-quality code, enhancing user experience, and achieving consistent results.

Professional Experience

Web Developer – Bianca Ferreira Design

07/2023 – Present | Website development for the clients of Bianca Ferreira Design studio
- Developed responsive web applications using React, JavaScript, CSS, Styled Components, and Material UI.
- Worked through the entire lifecycle from client requirements to final delivery and continuous maintenance.
- Applied SEO best practices, web accessibility (WCAG), and performance optimization techniques.
- Integrated APIs and managed code versioning with Git/GitHub to ensure traceability and organization.
- Managed task flow using Kanban for personal and client projects.
- Theoretical knowledge of Scrum through simulated academic projects.

Portfolio and Projects

- **Bianca Ferreira Design**

https://www.biancaferreiradesign.com | GitHub: https://github.com/Gibasa/bianca-ferreira-design
The client needed a modern, dynamic, multilingual professional portfolio to showcase her design work. I developed the UI using lightweight Lottie animations and i18n internationalization library, ensuring accessibility and performance.

Stack: React, Styled Components, Lottie, i18n

- **Copartners Bank**

https://cpt-bank.onrender.com | GitHub: https://github.com/Gibasa/cpt-bank
A fintech required a trustworthy and modern institutional website. I built a fully responsive layout with a strong focus on UX and performance, leveraging Material UI for visual consistency and accessibility.

Stack: React, Styled Components, Material UI

- **3P Energia**

https://www.3penergia.com.br | GitHub: https://github.com/Gibasa/3p-Energia

The company needed a lightweight and mobile-friendly platform to enhance its online presence and search engine ranking. I developed the site with semantic HTML, responsive design, and SEO optimization. Also implemented a functional contact form using EmailJS to automatically send inquiries to the company's email.

Stack: React, Bootstrap

Full portfolio: www.gilbertosa.com

Education and Training

- **Google UX Design Certificate** - 240h

User-centered design principles, prototyping, and usability testing with Figma.

- **Full Stack JavaScript Developer – T.EXperts (Cogna Group)** – 600h

Covered JavaScript, Node.js, React, programming logic, data structures, and REST APIs.

Courses and Certifications

- Technology Fundamentals – IBM Match! (90h)
- Data Science with Python – Santander Bootcamp (89h)
- 100 Days of Code – Python Bootcamp – Udemy (120h)
- Supplementary courses (Alura/Udemy): React Router, Context API, Styled Components, Flexbox and Grid, Flask, Sass

Education

- Bachelor's in Computer Science - Faculdade Ruy Barbosa (completed up to the 3rd semester)
- Bachelor's in Law - Universidade Católica do Salvador (completed up to the 8th semester)

Technologies Used in Projects

- Front-End: React, JavaScript, HTML5, CSS3, Sass, Styled Components, Material UI, Bootstrap
- Tools: Git, GitHub, NPM, Figma, AI-assisted coding tools (Copilot, ChatGPT, Gemini)
- Methodologies: Scrum (theoretical), Kanban (practical)
- Quality: SEO optimization, Accessibility, Performance

Languages

- Portuguese – Native
- English – Fluent
