PROFESSIONAL SUMMARY

Dynamic Associate in Enterprise Tech Support with a strong foundation in coding, database concepts, and product troubleshooting. Proven track record of resolving technical issues for S&P Global Market Intelligence enterprise products while delivering exceptional client support. Adept at quickly grasping evolving technologies and crafting innovative solutions to enhance support efficiency. Strong communication and analytical skills demonstrate a commitment to providing high-quality customer service and fostering positive client relationships.

TECHNICAL SKILLS

- **Programming Languages:** Core Java, OOP Principles, Data Structures
- **Database Management:** MySQL, PostgreSQL
- **Web Services/ APIs:** RESTful APIs and web services
- **Version Control:** Git
- **Web Technologies:** HTML, CSS, JavaScript
- **Frameworks:** Collections, Spring Boot
- **Connectivity:** JDBC

TRAINING

Trainee, 08/2023 - 08/2024

V Cube Software Solutions – Hyderabad, India

- Developed responsive web applications using Java and Spring Boot framework.
- Utilized front-end technologies including HTML, CSS, and JavaScript for user interface development.
- Assisted in software testing and debugging processes to ensure functionality and performance.

EDUCATION

B.Tech: Electronics and communication Engineering, 08/2023
Trinity College of Engineering And Technology - Peddapally, Telangana

Diploma: Electronics And Communication Engineering, 06/2020
Sindhura College of Engineering And Technology - NTPC, Telangana

CERTIFICATIONS

Java Full Stack Development Certification – V Cube Software Solutions

PROJECTS

Task Management System

- Developed a console-based Java application for efficient daily task management.
- Implemented CRUD operations (Add, View, Update, Delete) for managing tasks.
- Integrated the application with a MySQL database using JDBC for data persistence.
- Designed a user-friendly console interface for seamless task handling.
- Ensured clean code structure and modular design for easy maintenance and scalability.
- Demonstrated strong understanding of Java, JDBC, and database connectivity concepts.

Technology: Java, JDBC, MySQL

KEY SKILLS

- **Core Java & OOP Principles:** Strong understanding of Java fundamentals, object-oriented concepts, and data structures.
- **Java Frameworks:** Basic hands-on experience with Spring and Spring Boot through academic project work.
- **Database Management:** Knowledge of SQL and relational databases such as MySQL and PostgreSQL.
- **Version Control:** Familiarity with Git for source code management and collaboration.
- **RESTful Services:** Understanding of RESTful APIs, web services, and integration concepts.

SOFT SKILLS

- **Problem-Solving**: Strong analytical thinking with attention to detail and effective troubleshooting skills.
- **Communication & Teamwork:** Good communication abilities with experience working collaboratively in team environments.
