PROJECT

Sales Analysis and Forecasting Dashboard
Utilized historical sales data (over 3 years) to create a predictive dashboard in Power BI. Achieved 25% increase in reporting efficiency by automating monthly sales trend analysis. Improved decision-making for the marketing team by providing a forecast with a 90% accuracy rate.

Customer Segmentation for E-commerce Platform
Applied clustering techniques in Python to categorize customers based on purchase behaviour and demographics. Helped marketing team target high-value customer segments, resulting in a 20% increase in targeted campaigns effectiveness.

ACHIEVEMENTS
Developed a comprehensive database for supplier data, improving data retrieval efficiency by 30%.
Utilize Power BI to create visual dashboards that enhanced reporting clarity for stakeholders.
