Objective

Wanted to do work with experience person in your leading company to explore my views and ideas for better result.

Education

Malineni Lakshmiaha Women's Engineering College	12/2021 – 05/2025
Bachelor of Technology Electronics and Communication Engineering 7.5(CGPA)	
Pamulapati Butchi Naidu College	06/2019 – 03/2021
Intermediate MPC 7.6(CGPA)	
Z.P.High School	06/2018 – 03/2019
SSC 9.3(CGPA)	

Projects

IOT gas Sensor array for the Kitchen Safty
The Internet of Things has enabled the development of smart home technologies, including unbtrusive monitoring of household activities. In this study we propose on IOT based sensor array system for tracking cooking activites in a non-intrusive manner. The proposed system aims to create a smart cooking environment by untegrating an array of gas sensors, a keypad interface,and cloud-based analytics.

Weather Monitoring System
A Weather Monitoring System for framers is a crucial to provide actionable insights,leading to better crop managment by using IOT Technology.

Certificates

- AWS Cloud Computing
- HTML and CSS issued by Sololearn
- Java fullstack issued by 360digriii

Technologies

- programming Languages : C,Java
- Web Technologies   : HTML,CSS,JS
- Database Management   : SQL
- Version Control   : VSCode,Github

Soft Skills

- Problem Sloving
- Adapatability
- Team Collabration
