Figma

PROJECTS

Currency Converter (link) ⧉
Built a responsive Currency Converter web app using React, Tailwind CSS, and real-time API data. Allows users to convert between multiple currencies with instant updates and a clean UI.

Recipe-adda(link) ⧉
Developed a responsive Recipe Finder web app using React, Tailwind CSS, and Context API. Implemented search, recipe details, favorites, and dynamic API integration for a seamless user experience

Air-Todo(link) ⧉
Developed a feature-rich todo application incorporating CRUD functionalities built with React and Tailwind CSS ensuring an engaging user experience.

Random Password Generator(link) ⧉
Engineered a password generator allowing users to set customizable rules, featuring intuitive controls with copy-to-clipboard capabilities for convenience.
