Hiring Manager

Subject: Application for Software Developer / Engineering Position

Dear Hiring Manager,

I am writing to express my interest in a Software Developer/Engineering role at your esteemed organization. I have recently completed my B.Tech in Computer Science from Sharda University, where I built a strong foundation in full-stack development, problem-solving, and scalable software systems through internships and personal projects.

During my internship at Navstream Innovation LLP, I worked extensively on microservices architecture using Node.js and Express, improving API performance and building a live data gateway serving over 1,500 users daily. I have also developed real-world applications like **JobInfo24** (React Native + Firebase) and a **Budget Tracker** web app using modern React frameworks, Tailwind CSS, and ShadCN UI.

In addition to hands-on development experience, I have explored **DevOps practices**, including CI/CD pipelines, Docker, and deployment automation, and have worked with **LLM-based AI models** for projects involving AI-assisted solutions. Alongside, I have solved over **670+ DSA problems on LeetCode**, strengthening my logical and analytical skills. I am proficient in **JavaScript/TypeScript, Node.js, React, Firebase**, and modern software development workflows, and I bring a collaborative mindset with strong eagerness to learn and innovate.

I am motivated to contribute to impactful, user-focused software solutions and grow in a challenging, team-oriented environment. I believe my skills in full-stack development, DevOps, and AI/LLM technologies align well with your organization's vision, and I would welcome the opportunity to contribute to your team.

Thank you for considering my application. I look forward to discussing how I can bring value to your organization.

Sincerely,
Vivek Kumar
