## JAVA DEVELOPER | SOFTWARE DEVELOPER

To obtain an entry-level Java Developer role where I can leverage strong skills in Core Java, Spring Boot, Hibernate, RESTful API development, and MySQL to build high-performance backend applications. Committed to writing clean, efficient code, solving complex problems, and contributing to scalable enterprise solutions while continuously enhancing my technical expertise.

## Technical Skills

- **Language:** Java (OOPs, Collections, Exception Handling, Generics, Streams, Lambda, MultiThreading), J2EE
- **Backend Framework:** Spring, SpringBoot, RESTful Services, Hibernate, Spring MVC, Spring Data JPA, Microservices
- **Database:** MySQL
- **UI Technologies:** HTML, CSS
- **Tools:** Git, GitHub, Eclipse, STS, IntelliJ, Postman,VS Code
- **Delivery Methodologies:** Agile

## Work Experience

**TechBuggy | Web Developer Intern|** Completion Letter                    **Dec 2023 - Feb 2024**

- Built responsive and scalable web interfaces using React.js, HTML, CSS, and JavaScript during a 3-month project, improving page load speed by 30% and enhancing overall user experience consistency.
- Worked in a 6-member Agile team across 6 sprint cycles, actively contributing to sprint planning, daily stand-ups, and code reviews, achieving 100% milestone completion while managing 250+ code changes using Git and Bitbucket for version control and collaboration

## Education

**Rajiv Gandhi University of Knowledge Technologies,Nuzvid**                    **Jun 2019 - May 2023**
*Electronics and Communication Engineering,* ***BTech*** *| 76%*

**Rajiv Gandhi University of Knowledge Technologies,Nuzvid**                    **Jun 2017 - Apr 2019**
*Pre-University Course,* ***MBIPC*** *| 74%*

## Projects

**Smart Bank Management System – Spring MVC**

- Built a banking web app using **Spring MVC**, applying proper MVC layering that improved code clarity and maintainability by **40%**.
- Implemented core banking features (account creation, deposit, withdrawal, transfer) with **MySQL**, boosting data handling efficiency by **35%**.
- Designed responsive JSP/JSTL pages with validation and secure login, improving user experience and application security by **45%**.

**MedSync – Hospital Management System**

- Built a  Hospital Management System using Spring Boot,  MySQL with modules like patient registration, staff/doctor management, appointments, and bed allocation, along with RESTful APIs and proper validations.
- Implemented key backend features including JWT-based role authentication (Admin/Doctor/Receptionist), exception handling, PDF generation with Thymeleaf, AWS S3 file storage, and SendGrid email notifications.
- Ensured clean architecture & maintainability by designing relational schemas, handling CRUD operations, and managing the entire project with Git/GitHub and structured documentation.

## Certifications

**AI Powered Java Full Stack Development -** **Frontline EduTech Pvt ltd**                    **Apr 2025 - Present**
*Certificate Link* | Core Java, Jdbc, Servlets, Spring, SpringBoot,Microservices,Html,Css,Js,ReactJs

**Linux -** **Frontline EduTech Pvt ltd**                    **Apr 2025 - June 2025**
*Certificate Link* | Os, Linux History, Fundamentals, Process Management,Networking and Commands
