PROFESSIONAL SUMMARY

Backend Developer skilled in Java, Spring Boot, Hibernate, REST APIs, Microservices, MySQL, and AWS. Experienced in building scalable backend systems like payment integrations, debugging, API documentation (Swagger), and message queues (ActiveMQ). Seeking backend roles to contribute to real-world applications.

SKILLS

- **Programming Languages:** Java, JavaScript
- **Backend:** Java, Spring Boot, Spring AI, JPA/Hibernate, JDBC, ORM, J2EE (JSP/Servlets), Rest API, Microservices, Swagger
- **Cloud and Databases:** MySQL, AWS (EC2, RDS, Secret Manager, S3)
- **Methodologies:** Unit Testing (JUnit, Mockito), Agile Development, Scrum, Jira
- **Tools:** Maven, Tomcat, Lombok, SonarQube, Postman, Git, GitHub, Eclipse, Vs Code
- **Messaging & Patterns:** ActiveMQ, Circuit Breaker, Design Patterns, Exception Handling, Logging (SLF4J, Logback)
- **Concepts**: OOP, Multithreading, Collections, Data Structures and Algorithms
- **Soft Skills:** Communication, Problem Solving, Teamwork, Time Management

EDUCATION

B. Tech in Computer Science *Completed* 2025
Dr. Babasaheb Ambedkar Technological University – Lonere, Maharashtra

Higher Secondary Certificate (HSC) - Percentage: 83.33 *03/2021*
Dnyanopasak College of Arts, Commerce, Science – Parbhani, India

WORK EXPERIENCE

Java Developer Trainee **| Hulk Hire Tech** *Aug 2025 – Sep 2025 | Hyderabad*
- Built a Stripe payment integration system using Java + Spring Boot in a microservices architecture
- Implemented payment processing, status management, and Stripe REST API integration.
- Built secure notification and error-handling flows using Java Servlets.
- Improved debugging and reliability; wrote unit tests with JUnit & Mockito.
- Explored Spring AI with OpenAI LLM and integrated ActiveMQ for asynchronous messaging.
- Followed RESTful standards, applied design patterns, and strengthened debugging, reducing debugging time by 25%.

Java Full Stack Developer **| ExcelR Solutions** *Feb 2025 – July 2025 | Bangalore*
- Completed internship focused on developing full stack applications.
- Followed best coding practices and used tools like Maven, Git/GitHub, and Postman.
- Utilized tech stack: Backend - Java, Spring Boot, JDBC, Hibernate, REST APIs, MySQL; Frontend - HTML, CSS, Bootstrap, JavaScript, React.js.

PROJECTS

Employee Management: A system that performs CRUD operations using HTML/CSS, JavaScript, React, Bootstrap, Java, Spring Boot, Hibernate, Maven, and MySQL.

Task Management App: Designed a Task Management System using microservices architecture with Spring Boot (backend) and React + Bootstrap (frontend), integrated with MySQL for persistent data storage.

CERTIFICATES

- Software Engineering Job Simulation – JPMorgan Chase & Co
- AWS Academy Graduate – Cloud Foundations & Cloud Architecting
- AICTE – Emerging Technologies AI & Cloud
- MongoDB Developer – GeeksforGeeks
