## SUMMARY

React.js developer with expertise in JavaScript, React.js, React Native, Tailwind CSS, and Expo. Skilled in building responsive, high-performance applications, integrating APIs, and implementing AI-driven features. Experienced in modular, reusable code architecture, state management, and modern UI/UX design to deliver scalable and maintainable solutions.

## EDUCATION

**Gaya college of engineering, Gaya**                                                                 **Bihar, India**
*Computer Science and engineering*                                                                   *2021 - 2025*
**CGPA: 7.9/10**

## TECHNICAL SKILLS

**Programming Languages:** Java, JavaScript, C, C++
**Web Technologies:** HTML, CSS, Tailwind CSS, React.js, Node.js, Express.js, MongoDB, Next.js
**AI Tools:** Github Copilot , Cursor AI
**Tools and IDEs:** MySQL, Git, GitHub, Postman, WebStrom, VS code

## PROJECTS

**AI Resume Analyzer** LINK
- Developed a modern web app using React.js (Vite), React Router v7, Zustand, and Tailwind CSS to provide seamless authentication, resume uploads, storage, and cross-device compatibility
- Integrated Puter.js for serverless auth, cloud storage, and AI services, enabling ATS-style scoring, smart job matching, and personalized resume feedback without a custom backend.
- Implemented reusable UI components and modular architecture to ensure clean code, scalability, and a responsive, user-friendly interface.

**Green Cart** LINK
- Developed Green Cart, a full-stack grocery delivery platform using the MERN stack (MongoDB, Express, React, Node.js) featuring real-time product browsing, cart management, and secure online order placement.
- Built an admin/seller dashboard to manage inventory, upload grocery items, update product details, and monitor orders ensuring smooth end-to-end e-commerce operations.
- Integrated Stripe payment gateway for secure online transactions and implemented a responsive React + Tailwind CSS UI, delivering a complete production-ready shopping experience deployed to the web.

**subscription-tracker-api** LINK
- Developed a production-grade Subscription Management API using Node.js, Express, MongoDB (Upstash), and JWT authentication, enabling secure user onboarding, renewals, and real-time subscription tracking.
- Implemented scalable backend architecture with modular controllers, services, Arcjet security (rate limiting and bot protection), and automated email workflows using Nodemailer for invoices, expirations, and alerts.

## INTERNSHIP

**Salesforce Developer Virtual Internship** LINK                                                     March 2025
Learned Salesforce fundamentals, organizational setup, including relationships and process automation. Explored different types of flows and security models to enhance system efficiency.

## CERTIFICATE

- **Electronic Arts Software Engineering Virtual Experience Program** LINK                           March 2025
- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** LINK                     September 2025
- **Coursera – Google Cybersecurity** LINK                                                           June 2024
- **Cisco Networking Academy — JavaScript Essentials 1 (JSE)** LINK                                  May 2023
