Pournima Panchal
Full Stack Developer

A motivated Java Software Developer with hands-on experience in building backend applications and RESTful APIs using Core Java and Spring Boot. Skilled in API testing using Postman, frontend development with ReactJs, HTML, CSS, and JavaScript, and database management using SQL. Capable of developing, testing, and maintaining scalable web applications.

Experience

2024 - 2025
APLs web development
Software developer

One year of hands-on experience in Java Full Stack Development, working on designing, developing, and maintaining web applications using React JS, Core Java, Spring Boot, and SQL. Involved in full software development lifecycle including requirement analysis, frontend development, backend API development, database integration, and testing. Experienced in building RESTful APIs and validating them using Postman to ensure smooth client–server communication.

Project: Hotel Room Booking System

Description:
 Developed a full stack Hotel Room Booking Application that allows users to view available rooms, make bookings, and manage reservations through a responsive web interface.

Roles & Responsibilities

- Developed responsive frontend UI using HTML, CSS, JavaScript, and React JS
- Implemented backend services and REST APIs using Core Java and Spring Boot
- Designed and integrated SQL database for room, booking, and customer data
- Implemented CRUD operations for rooms and reservations
- Tested and validated APIs using Postman
- Worked on bug fixing, performance improvement, and code optimization

Key Features

- Display available hotel rooms with details
- Room booking and reservation management
- Admin module to add, update, and delete room details
- Secure backend APIs for handling booking operations
- Database integration for storing customer and booking information
