Naveen K

Senior Full Stack Developer

naveenchandran505@gmail.com | +91 8891431191 | Calicut, Kerala | linkedin.com/in/naveen-chandran-807770201

Profile

Full Stack Developer with 3.8 years of experience in **MERN stack development (React.js, Node.js, Express, MongoDB)** and **MySQL**. Skilled in designing and developing responsive, high-performance web applications. Strong problem-solver with a focus on code quality, scalability, and collaboration across frontend and backend teams.

Skills

Frontend / Client-Side:: React.js, Redux, JavaScript (ES6+), HTML5, CSS3, PHP, Laravel, MUI, Bootstrap, Responsive Design, UI/UX

Backend / Server-Side:: Node.js, Express.js, MongoDB, MySQL, JWT, RESTful APIs, EJS, Server-Side Logic, API Integration

Development Tools & DevOps:: Git, GitHub, AWS (Basics), Postman, Jira, Agile Workflow, WhatsApp Cloud API, BigMailer

Testing & Quality Assurance:: Mocha, Jest, Unit Testing, Code Optimization, Performance Tuning

Additional Skills / Design & Multimedia:: Blender 2.8 (3D Modeling), Adobe After Effects (Video Editing)

Work Experience

Senior Web Developer, Trusttech Solutions PVT LTD ⧉   06/2025 – Present | Kochi, India
- Lead **frontend development** of live **PHP Laravel projects**, delivering **responsive, user-friendly, and visually consistent interfaces** across all devices.
- Collaborate with **backend developers** to integrate dynamic features using **HTML, CSS, and JavaScript**, ensuring alignment with Laravel architecture.
- Optimize **cross-browser compatibility**, **accessibility**, and **frontend performance** to deliver **production-ready, high-quality applications**.
- Maintain and enhance **frontend architecture**, ensuring **scalability** and seamless integration with Laravel-based backend systems.
- Contribute to **full-stack development** by designing and consuming **RESTful APIs**, managing **data flow**, and implementing minor backend logic in **Node.js** and **Laravel**.
- Participate in **code reviews**, **Git-based version control**, and **Agile development cycles** to ensure the timely delivery of features and enhancements.
- Improved overall **page load performance by 20%** through code optimization, asset management, and best practices implementation.

Full Stack Developer (MERN Stack),   10/2021 – 01/2025 | Calicut, India
Confyans IT Solutions and Technology ⧉
- Delivered **end-to-end web solutions** with 3 years of experience across the full development cycle — from **frontend design** using **React.js** to **backend development** with **Node.js**, and **database management** with **MongoDB** and **MySQL**.
- Designed and implemented **responsive, user-centric web applications**, ensuring smooth functionality and optimal **UI/UX performance**.
- Built and integrated **RESTful APIs**, implemented **unit tests**, and maintained clean, reusable, and scalable code.
- Created and optimized **databases and normalized tables** in **MongoDB** and **MySQL**, ensuring efficiency and data integrity.
- Improved **application performance** and reliability across 4+ live projects through testing, debugging, and code optimization.
- Collaborated using **Git** for version control, ensuring structured workflows and seamless teamwork.
- Integrated **WhatsApp Cloud API** to enable real-time messaging and enhance user engagement.

Projects

Ad Run Digital, Social Media Marketing System ⬈
- Developed both **frontend (React.js)** and **backend (Node.js, MongoDB)** of a social media marketing platform for retailers and brands.
- Integrated APIs for dynamic data handling and ensured responsive UI/UX design.

Confy HR, Confyans Staff Management System ⬈
- Built **frontend (React.js)** and **backend APIs (Node.js, MySQL)** for a staff management web application.
- Implemented **WhatsApp template messaging** and **social login features** to enhance functionality.

DCMS, Hospital Management System ⬈
- Developed the **admin interface** to manage patient details, payments, and hospital operations using **Laravel and MySQL**.
- Optimized **frontend performance and user experience** for administrative tasks.

CRM, Customer Relationship Management System ⬈
- Developed a **CRM system** using **React Vite, Redux, Node.js, Express.js, and MongoDB**.
- Implemented **state management with Redux** for efficient data flow and component reusability.
- Designed and integrated key modules: **Customers, Companies, People, Leads, Offers, Invoices, Payments, Products, Expenses**.
- Implemented **role-based access control** with JWT for secure authentication and authorization.

Education

B.Tech in Electronics & Communication Engineering,   2015 – 2019
6.12 CGPA | APJ Abdul Kalam Technological University ⬈

Awards

2nd Price Kerala Startup i3   2017
Won 2nd prize in a project competition conducted by
Kerala Startup i3 at UKFCET, Kollam

SRISHTI PROJECT EXPO   2016
Participated in SRISHTI PROJECT EXPO (state level)
Conducted by Kerala Start-up Mission as a part of
Tharang'17(college level).
