SUMMARY

I am a dynamic and results-oriented software engineer with over **3+ years** of experience in designing, developing, and optimizing scalable web applications. I am proficient in Java and skilled in frameworks such as **Spring Boot.** My expertise lies in database performance optimization and user-centric solutions. I thrive in team environments, driving innovation and ensuring successful project outcomes

SKILLS

Java	Spring	Spring Boot	C/C++	Maven	Servlet	JSP	JPA	Hibernate	PostgreSQL	MySQL	Git
JIRA	HTML	JavaScript	REST API	Postman	SDLC	Agile	Ruby on Rails	Twilio	DBMS	OOPS	JDBC

EXPERIENCE

Software Engineer

Task Source

📅 01/2025 - Present   📍 Indore, India

Task Sourse Technology delivers scalable, high-performance digital solutions that empower businesses with reliable and seamless applications.

- Conducted code reviews, maintained documentation, and contributed to knowledge-sharing initiatives.

Software Engineer

Witmates Technology

📅 08/2022 - 12/2024   📍 Indore, India

Witmates Technologies delivers scalable, innovative, and efficient software solutions across diverse industries.

- Enhanced application reliability by addressing critical issues, optimizing code, and improving system performance.

PROJECTS

Property Explorer

📅 2025   📍 Indore, India

Kuwait Property Listing

- Led development of Property Explorer, a scalable marketplace platform enabling seamless vendor onboarding, product listings, and real-time order processing
- Implemented **high-performance search APIs** for properties/products with complex filters such as geographical range (lat/long), pricing, and categories
- Contributed to **scaling the platform**, reducing server load, and enhancing overall customer experience
- Developed and integrated advanced AI features using **OpenAI APIs**, including chat-based conversational flows and text-to-speech functionality
- Engineered prompt-based automation using admin-level command inputs to ensure high-accuracy, context-aware responses
- Engineered prompt-based automation using admin-level command inputs to ensure high-accuracy, context-aware responses

Lochi Market

📅 2023   📍 Indore, India

E-commerce Website

- Developed an e-commerce platform in Java with features such as customizable product delivery methods, location-based product availability, and controlled regional access
- **Geo-code**r for accurate distance calculations to manage product availability based on location
- Integrated third-party services including **PayPal and Apple Pay** for secure payment processing

EDUCATION

Master OF Computer Application (MCA)

School Of Computers IPS Academy

📅 06/2020 - 06/2022   📍 Indore

INTERESTS

🏅 **HackerRank, LeetCode, Chess, Stock Market**

Interested in coding challenges, strategy games, and stock market dynamics.
