## SUMMARY

Software Engineer with 2+ years of experience in full-stack development, specializing in Java, Spring Boot, Microservices, and Cloud technologies. Skilled in building scalable, secure, and high-performance applications with a strong focus on problem-solving and optimization. Passionate about agile practices, automation, and modern software engineering principles.

## SOLUTION SPECIALTIES

- Full-Stack Development
- Microservices Architecture
- API Development
- Debugging
- Application Development
- RESTful API Design
- Software Design
- Database Design
- Generative AI Integration

## DOMAIN EXPERTISE

- SaaS Applications
- Enterprise Application Development
- Web Application Solutions
- Backend Services
- Developer Experience
- API Management
- Cross-Platform Integration
- Product Management

## SKILLS

| | |
|---|---|
| Programming | Java \| Python \| JavaScript |
| Frameworks & Technologies | Spring Boot \| React.js \| REST APIs \| Microservices Architecture \| JWT Authentication \| WebSockets |
| Design | System Design \| Software Design \| Design Patterns \| OOP \| Multithreading |
| Database | PostgreSQL \| JPA |
| Tools | Git \| Docker \| Maven \| Linux |
| AI | Generative AI Integration \| OpenAI API \| Data Validation & Schema Enforcement |
| Specialized Areas | Debugging \| Performance Optimization \| Secure Coding \| Cloud Deployment (AWS basics) |

## EXPERIENCE

### Full Stack Developer - MTS | Zoho Corporation

2022 – 2024

Responsibilities –

- Enhanced and optimized microservices architecture, improving system stability and achieving 40% performance gain through query tuning and caching strategies.
- Designed and developed RESTful APIs for high-traffic applications, reducing latency and increasing throughput.
- optimized PostgreSQL queries, reducing CPU load by 40% and cutting response time by 50%.
- Built secure authentication mechanisms with data encryption and RBAC, ensuring compliance and safeguarding sensitive data.
- Conducted code reviews, enforced best practices and design patterns, and mentored junior developers to maintain technical excellence.
- Played a key role in production support, resolving critical issues and maintaining 99.9% system uptime
- Improved build and release processes, streamlining deployments and reducing downtime.
- Resolved critical bugs and optimized workflows, improving system stability

## PROJECTS

### Valyrian Safe | Password Manager | Live Demo

- password manager with Spring Boot and React, ensuring encryption and data protection.
- Added JWT authentication and stored passwords using AES/CBC/PKCS5Padding encryption.

### TalentRealm| Resume Analyzer & Job Matching Platform | Live Demo

- Developed a Resume Analyzer using React and Spring Boot with AI-based parsing.
- Implemented a matching engine for job-resume compatibility and secure schema validation.

### Westeros Watch | License Plate Detection | Live Demo

- Developed a license plate recognition system that extracts vehicle numbers from images.
- Integrated a lookup feature to identify ownership details and redirect to relevant information

## CERTIFICATIONS/TRAINING

- AWS Fundamentals Specialization
- Python for Everybody Specialization
- Oracle Cloud Infrastructure Foundations Associate

## EDUCATION

### Bachelor of Technology (B.Tech) | Guru Nanak Institutions Technical Campus

**Hyderabad, Telangana, India**

2022
