SHAIK KHADARBHASHA

Software Test Engineer

• +91-8688939297 • khadarbashashaik002@gmail.com • Hyderabad, Telangana, India

Summary

QA Automation Tester with **3.5+ years of experience** in both manual and automation testing across web, mobile, and API platforms. Experience in **Playwright with JavaScript** for web automation and **Appium** for mobile testing on Android and iOS devices. Used **Postman** for **API testing**, and set up automated tests as part of **CI/CD** pipelines with **Jenkins**. Familiar with **Agile practice**s, black-box testing techniques, and full-cycle test documentation, including test strategies, test cases, and defect reports. Skilled in **analyzing functional requirements**, writing and executing test scripts, logging defects using **JIRA**, and collaborating effectively with cross-functional teams. Identifying test scenarios, and delivering high-quality software through structured QA processes.

Professional Experience

Working as Software Test Engineer – Automation and Manual Testing in Orblike Technologies Pvt Ltd, from February 2022 - present date.

Skills

Automation Tools
- Playwright (Web automation)
- Appium (Mobile automation)

Mobile Testing Tools
- Android Studio (for testing)
- Xcode (for iOS testing)

API Testing Tools
- Postman

Test Management & Defect Tracking Tools
- JIRA

Development & IDE Tools
- Jenkins
- GitHub
- Visual Studio Code

Programming & Scripting Languages
- TypeScript, JavaScript
- HTML, CSS

Processes & Methodologies
- Agile (Scrum)
- SDLC & STLC

Project

Orblike Technologies Pvt Ltd - Hyderabad, India - QA   February/2022-Present

Project : **ProppyApp(Clint)**
Description:

       ProppyApp is a property and community management platform that allows users to handle real estate transactions (buy/sell/rent) and connect with registered merchants providing various products and services. It serves as a centralized solution for managing personal residential needs and accessing local service providers within housing communities.

Roles & Responsibilities

- Designed and executed **automated test cases** for critical workflows using **Playwright**, covering property listings, user registration, and merchant service booking.
- Experience in testing with knowledge of Automation Framework Design & Implementation using **Page Object Model (POM)** Design Pattern.
- Integrated automated test suites into the **CI/CD pipeline using Jenkins** to ensure reliable and consistent test execution during deployments.
- Conducted **API testing** with **Postman** for order processing, merchant listings, and transaction validations including request/response validation and error handling.
- Exposed to **Playwright** with **JavaScript** for **API testing.**
- Tested mobile applications across various devices and OS versions, validating key features and performance.
- Conducted cross-browser testing to verify compatibility across major browsers and platforms.
- Logged and tracked defects in **JIRA**, collaborated with development teams for debugging and resolution.
- Participated in **Agile ceremonies**, contributed to sprint planning, backlog grooming, and test estimation.
- Executed regression, sanity, and smoke testing for release cycles, maintaining test case traceability.
- Maintained test data, reusable functions, and contributed to automation framework enhancements.
- Used browser developer tools to inspect UI elements and troubleshoot layout or console errors.
- Contributed to continuous improvement of QA processes and testing strategies.

Project : **Proffis(Admin)**
Description:

       Proffis is the admin-facing backend platform used for managing users, property records, and merchant accounts within the Proppy ecosystem. It enables administrators to oversee listings, onboard service providers, monitor transactions, and track service orders to ensure smooth backend operations and analytics dashboards, and role-based access controls.

Roles & Responsibilities

- Automated admin panel test cases for workflows such as property approval, merchant onboarding, and service order management.
- Integrated backend automation tests into the **CI/CD pipeline using Jenkins** to support frequent releases and hotfix validations.
- Performed comprehensive **API testing** for workflows using Postman.
- Exposed to **Playwright** with **JavaScript** for **API testing**.
- Executed regression, sanity, and smoke testing for release cycles, maintaining test case traceability.
- validated role-based access for different admin levels.
- Created and updated detailed test documentation, including **test plans, execution reports**, and **defect summaries**.
- Used browser developer tools to inspect UI elements and troubleshoot layout or console errors.
- Contributed to continuous improvement of QA processes and testing strategies.

Education

Pedanandipadu Arts & Science Degree College, Acharya Nagarjuna University, Andhra Pradesh.

B.Sc Computers   05/2016 - 05/2019
