SHUBHAM CHAUDHARI Software Engineer

Software Development | Project Management | Database Management System

: +91 9890514305

:
shubhamchaudhari.sitcomp@gmail.com

Key Skills

- Backend Development
- Java Development
- Frontend Development
- Web Development
- Scalable System Design
- Object Oriented programming
- Data Structures & Algorithms
- Client Management
- Problem Solving Skills
- Collaboration and Teamwork
- Time Management

Education

- **B. E. in Computer Engineering** from Sinhgad Institute of Technology, Lonavala, 9.28 CGPA
- **Diploma in Computer Technology** from Sanjivani KBP Polytechnic, Kopargaon, 71.82%

Technical Skills

- Java, C/C++, SQL
- HTML, CSS, Power BI
- C#,.NET

Certifications

- Completed **Java Programming Certificate** on Great Learning Platform

Profile Summary

Motivated and Enthusiastic professional with 10 months of hands-on experience in software application development and database management. Proficient in Java, Object-Oriented Programming (OOP), basic Data Structures, and SQL, with a solid foundation in database technologies like HSQL. Skilled in problem-solving, debugging, and application performance optimization. Quick learner with the ability to adapt to new technologies and collaborate effectively within teams.

Key Deliverables

- Passionate about building scalable and efficient backend solutions with a keen eye for problem-solving and software architecture
- Strong teamwork, communication, and project management skills, with a passion for learning and adapting to new technologies

Work Experience

System Engineer | Infosys | Oct 2024 – Feb 2025

- Built a strong foundation in Java programming, with a focus on Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)
- Gained expertise in SQL and HSQL databases, enhancing skills in Database Management Systems (DBMS)
- Applied core programming concepts, problem-solving techniques, and best coding practices to develop efficient solutions
- Learned and implemented software development methodologies, including the Software Development Life Cycle (SDLC)
- Worked on hands-on projects to design, optimize, and manage database-driven applications

Data Engineer | Aligned Automation | Apr 2022 – Jun 2022

- Built a strong foundation in SQL, enhancing database management skills
- Acquired knowledge of Database Management Systems (DBMS) and their applications
- Gained hands-on experience in SQL and basic Power BI during the internship
- Worked with MySQL Workbench, applying database queries and management techniques

Projects

- Live Inventory Tracking System
- Sport Club Management System
