Work Experience

Software Developer Engineer | Stakrid | Internship   2025(Aug) - 2025(Oct)

- Built and maintained responsive UI screens using **React.js, Framer Motion** and TailwindCSS, improving user experience and performance.
- Utilized Framer Motion's variants and animation controls to create interactive, fluid component transitions across various screen sizes.
- Integrated third-party services such as payment gateways (Razorpay/Stripe) and real-time features using WebSockets and deployed apps on cloud platforms like **Vercel/AWS**.
- Integrated basic security measures such as input validation and content sanitization to prevent XSS vulnerabilities and ensure safe user interactions.

Full Stack Developer | Amiigo Tech | Internship   2024(Dec) - 2025(Feb)

- Developed and maintained scalable web applications using **Next.js** for both frontend and backend functionality, leveraging MongoDB for efficient database management.
- Utilized TailwindCSS and Shadcn to create visually appealing, responsive user interfaces with a strong focus on performance optimization.
- Designed and implemented reusable UI components and followed DRY principle of coding, enhancing consistency and development efficiency.
- Collaborated with cross-functional teams to ensure timely project deliveryand alignment with business requirements
- Developed backend APIs for authorization and authentication, session handling and for admin dashboard.

Frontend Developer | GymForce Technologies | Internship   2024(Sep) - 2024(oct)

- Enhanced web application performance by **40%** through strategic **API call consolidation** and implementation of global state using Redux, optimizing data management.
- Improved user session handling by integrating Axios interceptors, ensuring seamless and secure user interactions.
- Utilized Framer Motion's variants and animation controls to create interactive, fluid component transitions across various screen sizes.
- Worked on technologies like React, JavaScript, CSS, HTML, MaterialUI, TailwindCSS and contributed in the development of software, used by thousands of real users daily.

Skills

Fundamentals	- Data Structures and Algorithms, Object Oriented Programming, Operating System, DBMS
Programming languages	- JavaScript, Python
Other languages	- HTML, CSS
Frameworks	- Next.js, Express.js, Bootstrap, LangChain, LangGraph
Libraries	- React, Redux, TailwindCSS, GSAP etc.
Databases	- MongoDB, MySQL, Postgressql
Additional	- Version controlling (Git), Node.js, Full Stack MERN Web Application Development, RESTful API, Fast API
Soft Skills	- Problem Solving, Teamwork, Time management, Critical, Analytical and Creative thinking etc.

Personal Projects | [Link]

Have implemented my learnings by developing projects in categories like Dev-Community, Gmail-Generate-Agent, Software-AI-Agent, e-commerce web applications, and real time code editor, too.

Certifications

- The Web Development Bootcamp ↗
- Python For Beginners ↗
- LangChain Essentials - Python ↗
- Introduction of LangGraph ↗

Education

Bachelor of Technology, Computer Science and Engineering   2021(nov) - 2025(July)
Rajkiya Engineering College Mainpuri
